WORK EXPERIENCE

Software Engineer II

Visible Alpha , June 2017 - March 2021

- Developed a module used by hedge fund analysts to understand the forecast and historical data of companies across different sectors and industries.
- Developed an automated service to fetch and parse files from the SFTP server and add data to the database. Earlier, this entire process used to be done manually.
- Laid out a foundation to migrate the entire backend application from MySQL 5.6 to MySQL 8.0
- Co-Developed an in-house web analytics tool to keep track of user activities and provide a detailed report.
- Contributed in Sharding activity which improved data fetching performance and reduced load time by 20%
- Contributed in migrating entire application from Angular 2 to Angular 8

`Python` `Django` `MySql` `PubSub` `Angular 8`

Software Engineer

Godcast Messenger , Feb 2016 - June 2017

- Worked as a mobile, web engineer, and single-handedly developed new features for android application.
- Single-handedly migrated data from Facebook's Parse DB to Mongo DB, media files to AWS, and deployed application to Heroku.

`Android` `MongoDB` `Java` `Parse Server` `AWS`
